with N. Main Street

8

South Main Street (East): a collapsed stone headwall and
a 3' culvert, ending at the base. Broken asphalt and concrete
swale around it. The culvert appears to be non-functional and
body in need of repair.

South Main Street (West): a 3' culvert with stone headwall and
rip-rapped swale, ending at the base of the headwall.

GRRIP II (Geographic Roadway Runoff Inventory Program) is an analysis of roadway drainage facilities in relation to intersecting environmentally sensitive areas on defined Federal Aid "functionally classed" roads. The GRRIP II project analyzed 18 SRPEDD towns within the Narragansett Bay Watershed Region and mapped those storm water drainage systems considered to be located in critically sensitive environmental areas.

The Towns are Fall River, Freetown, Lakeville, Middleborough, Carver, Somerset, Swansea, Berkley, Taunton, Raynham, Seekonk, Rehoboth, Dighton, Attleboro, N. Attleborough, Norton, Mansfield, Plainville.

Map Produced by SRPEDD
Narragansett Regional Planning & Economic Development Council
Taunton, MA
June 2002

This map was produced by SRPEDD (Southern Regional Planning and Economic Development Council), Taunton, MA. Features of the source digital data may have been updated by the Massachusetts Executive Office of Environmental Affairs, Massachusetts Coastal Cooperation of Boston, MA. USFS, the Bureau of Transportation Planning & Development, Division of Marine Fisheries, Division of Fisheries & Wildlife, BWSF, USDA, Natural Conservation Service, Coastal Zone Management, National Oceanic & Atmospheric Administration (NOAA). The location of feature boundaries shown on this map are approximate and are intended for planning purposes only. This map is not intended for legal, engineering or survey purposes.

The funding for this project was provided by the Executive Office of Transportation (EOT) and the Massachusetts Highway Department under the Watershed Program.
