The funding for this project was provided by the Executive Office of Transportation (EOTC) and the Massachusetts Highway Department under the STP Transportation Enhancements Program.

The GRRIP (Geographic Roadway Runoff Inventory Program) is an analysis of roadway drainage facilities in relation to intersecting environmentally sensitive areas on defined Federal Aid "functionally classed" roads. The GRRIP project analyzed 14 SRPEDD towns within the Buzzards Bay Watershed Region and mapped those storm water drainage systems considered to be located in critically sensitive environmental areas.

The map was produced by SRPEDD (Southern Regional Planning and Economic Development District) Taunton, MA. Portions of the source digital data may have been supplied by the Massachusetts Executive Office of Environmental Affairs, Massachusetts Coastal Corporation of Newbury, MA, ESRI, the Bureau of Transportation Planning & Development, Division of Marine Fisheries, Division of Fisheries & Wildlife, Buzzards Bay Project, USGS, Soils Conservation Service, Coastal Zone Management, National Oceanic & Atmospheric Administration (NOAA). The location of feature boundaries shown on this map are approximate and are intended for planning purposes only. This map is not intended for legal, engineering or survey purposes.

The Towns are Acushnet, Carver, Dartmouth, Fairhaven, Fall River, Freetown, Lakesville, Marion, Mattapoisett, Middleborough, New Bedford, Rochester, Wareham, Westport
